

GEORGE ELEMENTARY ENRICHMENT

SCHOOLWIDE ENRICHMENT

Each grade level receives 30 minutes of whole group enrichment every week. The main focus of whole group enrichment is to give students extra opportunities to discover and explore topics outside the core curriculum. Students explore art and technology which prepares them to actively learn about their own creativity.

Fourth grade students researching
on computers!

HIGHLY CAPABLE PROGRAM

The highly capable pull out program includes students who have been identified as possessing unique talents and capabilities. We provide challenging enrichment activities that foster student development. These activities focus on problem solving techniques, interactive simulations, working in pairs and groups, and analyzing and sharing information and ideas. The students meet for 30 minutes one day per week with a facilitator focusing on the above activities.

For more information on nominating your child for the Highly Capable Program, please contact the George Elementary office.

Third grade students participating
in a fun experiment!

MATH ACCELERATION

Students in the top 25% of their math classes will have the opportunity to be part of an accelerated math group once a week.

The focus of the group will be to develop mathematical problem solving through a variety of hands-on activities which will include team simulation, strategy games, mathematical puzzles and brain teasers.

For those students selected, it's a great opportunity for students to excel their math skills!
